

IN- RGY

IN-INTEGRATION

We advise and guide our clients through organizational transformation and deployment of best technologies serving Human Resources.

● Your systems work together to empower your employees

High-level tools adapted to your environment and your processes that will greatly improve your organization's ability to keep ahead of your competitors and guarantee a positive return on investment.

Our team of experts can meet a large scope of HR needs for organizations of all sizes by integrating specialized solutions and additional applications in their projects.

A well-adapted technological solution is a key competitive advantage for your organization.

Combined with our vast HCM technological experience, we understand and focus on the organization's internal HR role and the operational infrastructure required to support your objectives.

The IN-Integration team works in collaboration with the IN-Strategy team to adapt the technology to your specific requirements. By allowing you to implement the right solution for your organization, IN-RGY helps you to realize value more quickly and speed up your return on investment.

● The complete solution during the employment lifecycle, from beginning to end

Our experience and methodology allow a quick delivery based on quality standards and solutions adapted to your situation. This leads to a long-term satisfaction because of its stability and adaptability.

We implement full HRIS solutions and functionalities that complement the existing technology.
